**CSG PRESIDENT**

## LETTER FROM THE PRESIDENT

The Galician Health Cluster, CSG, is a professional platform for public-private cooperation that acts as a catalyst for the competitiveness of the healthcare and social care industries, contributing decisively to the economic and social development of the Galician region. Our main objective is to make Galicia the best region to grow old. Our actions are focused on supporting innovative solutions that improve the people's well-being and respond to the needs of the sector.

We follow a model centered on the person and based on clinical excellence, R+D+i, digital transformation and the development of technology-based products whose purpose is the well-being of the person from a holistic perspective taking into account the health status and environment (climate, housing and social relations).

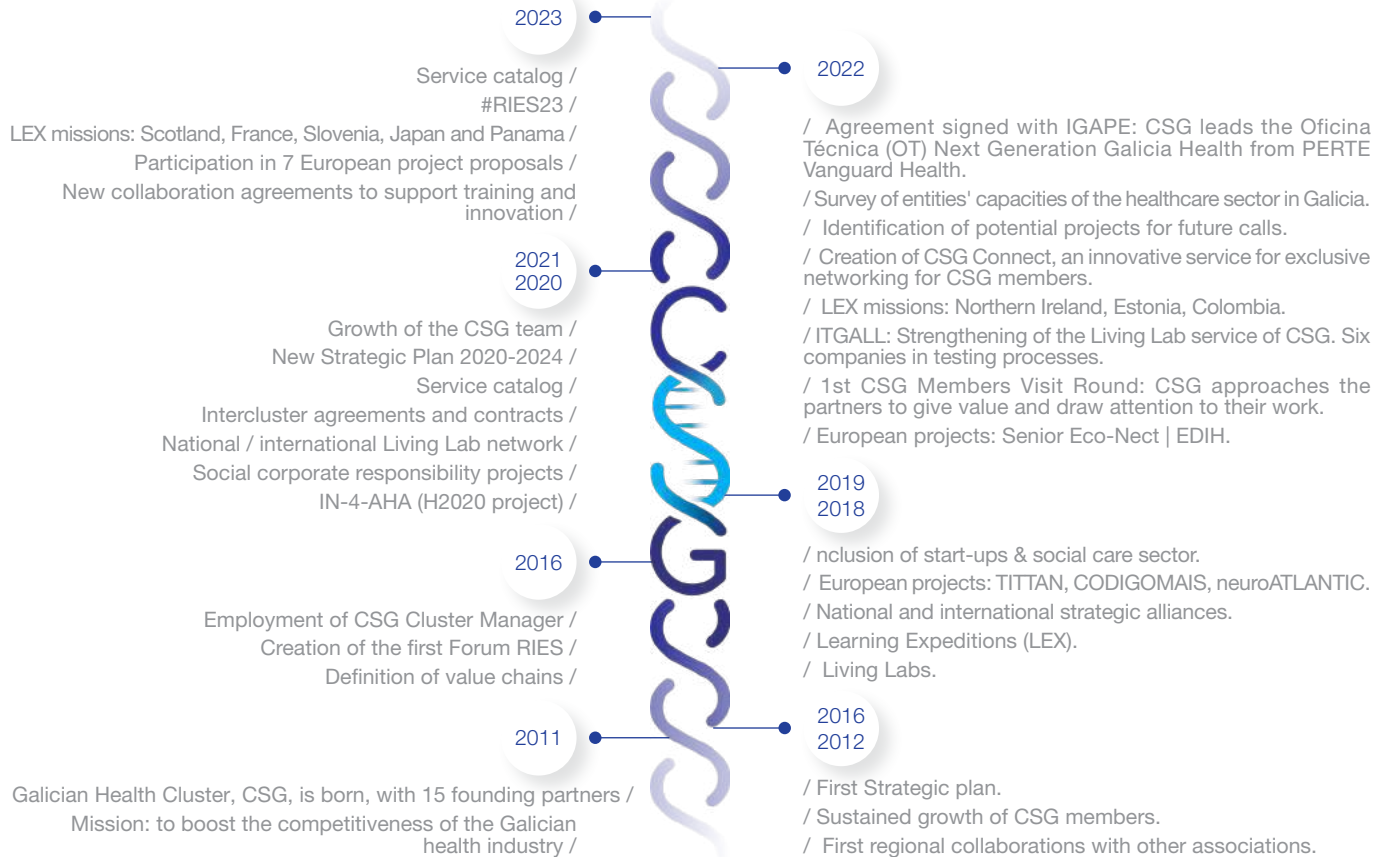

Collaboration is imprinted in CSG's DNA, leading and representing the Galician health ecosystem in several international networks and being a active member in the national network of Spanish autonomous health clusters (#ClustersSaludEspaña).

We act as a communication channel between users, providers and regulators and we translate the needs of the former to help the latter and adapt their policies to the real demand of society. We believe in intersectoral collaboration, since health is interrelated with sport, the environment of life and nutrition.

In 2021, coinciding with the tenth anniversary since its foundation, the CSG experienced an exponential growth of its internal structure that resulted in three areas strengthened that support management: Management, Internationalization and Communication. This increase in human resources responds to an increase in funding obtained and services provided as well as a renewal of CSG's strategic plan.

From CSG we carry out activities to learn about the synergies that can occur within the ecosystem itself, providing solutions to challenges with resources within the region itself while looking for investment opportunities for its innovation projects.

# CSG Evolution

# THIS IS WHO WE ARE

Galician Health Cluster, **CSG**, is a public-private community made up of entities from the care sector.

## MAIN OBJECTIVE

Support **innovation** for the co-creation of solutions that improve people **well-being**.

### Specific objectives:

To boost growth and competitiveness of Galician health sector stakeholders.

To improve knowledge and networking between agents in the Galician healthcare and social care sectors, enhancing synergies and collaborations.

To improve national and international positioning of the Galician healthcare ecosystem.

To facilitate the identification of opportunities and their collaborative exploitation by the Galician healthcare and social care ecosystem.

To represent and defend the interests of the Galician healthcare and sectors before society (especially public administrations, other sectors and citizens), as well as its representation in national and international forums.

To promote the social and healthcare approach in the Galician ecosystem and to position itself as a reference in the sector.

# CSG Structure

We have updated the current organization chart of CSG, linking it with the established axes of action and designing a new operational structure in coordination with the management direction and with the areas of management, communication and internationalization.

A blue-tinted photograph showing a top-down view of a meeting table. Several people are seated around the table, their hands and arms visible as they work with documents. One document prominently displays the text "BE TEAMWORK". Other documents feature various charts and graphs. The overall scene conveys a collaborative business environment.

This is the new  
Organization chart and

# OUR VALUE CHAINS

At CSG we are transversal to many business sectors. Our value chains must show the capacity they have for

all industries that are part of it. For this reason, we have redeemed being determined the following way:

HEALTHCARE

Industrial or service sectors aiming at direct assistance to the person in a reactive or proactive way.

KNOWLEDGE

It encompasses the entire scientific research industry that directly or indirectly seeks to improve people's health through the generation of new knowledge.

QUALITY OF LIFE AND CARE MODELS (SOCIAL CARE)

It encompasses companies with the purpose of treating health as a way of life, including improvements in habits, customs, nutrition, etc.

STRUCTURE

Includes those activities that involve the construction of material and immaterial elements (hardware and software) for health purposes.

# CSG Members

# CSG Members

# Partners and collaborators

Xunta de Galicia is the regional government of Galicia. As in CSG we believe in a public-private collaboration, we have established a long term collaboration around the areas of internationalization and industry competitiveness with the regional ministries of Health, Social Affairs and Youth, Economy, Industry and Innovation as well as Employment and Equality.

DATAlife is the Digital Innovation Hub of the primary sectors, biotechnology and health of Galicia. Its mission is to facilitate the incorporation of Artificial Intelligence (AI), Data Analytics (Big Data), Internet of Things (IoT), high performance computing and cybersecurity in SMEs Galician from sectors linked to the bioeconomy and health. CSG is a founding member of DATAlife and the leader of the healthcare node.

CSG has the institutional support of the Chamber of Commerce of La Coruña and they share the challenge of strengthening the health ecosystem of Galicia through different actions carried out together such as the Lex Missions and the active participation of the CSG in EXPORPYMES. Both actions seek to promote and give impetus to the internationalization of Galician companies.

# Partners and collaborators

Cluster de Madeira e o Deseño de Galicia includes the industry of wood in the development of products nation and international wide, as well as companies that are a benchmark in design and innovation. CMD and CSG signed an MOU to promote the collaboration and synergisms between these two sectors.

Clúster Galego da Industria do Deporte e o Benestar was established in 2021 as a tool to benefit the companies that are part of the Galician sports industry. CSG and Clúster Galego da Industria do Deporte e o Benestar have clear collaboration points as exercise is a fundamental part of healthcare.

Clúster Galego de Solucións Ambientais e Economía Circular was born with the mission to increase technological capacity, innovation and competitiveness of Galician companies that provide environmental solutions. Considering the Galician healthcare system is conscious of energy efficiency and carbon imprint of the sector, it has led the circular economy strategy and participates in several greentech proposals together with CSG. Therefore the two industrial representatives CSG and Viratec are bound to collaborate.

# Partners and collaborators

## Nationals

The alliance of healthcare clusters of Spain englobes: Arahealth (from Aragon), Basque Health Cluster (of the Basque Country), Bioga (from Galicia), Bioval (from the Valencian Community), CSG – Galician Health Cluster (from Galicia), CSMC – Mental Health Cluster of Catalonia (of Catalonia) and Cluster of Innovative Solutions for Life Independent (Cluster SIVI, of Castilla y León). They have united to face the most relevant challenges that companies in the care sector face. CSG participates in the elaboration of a common strategy.

## Internationals

European Connected Health Alliance (ECHAlliance) is a global network of alliances for digital health that connects to more than 700 organizations and more than 16,500 experts. The ecosystems ECHAlliance are partnerships multi-stakeholder, permanent and with a regional focus, committed to working for implementing innovative solutions to improve the quality of health and well-being of citizens and the effectiveness of the health system. CSG coordinates the Galician ECHAlliance ecosystem.

Twins' International MultiHelix (TIM) was born in 2016 as a result of the union of five international clusters and MultiHelix AB. Its main objective is to facilitate the investments, partnerships and represent collaboration in science life and technologies between the parks scientists and clusters North, Asia and Europe. CSG is an active member of the TIM MultiHelix community and participates in EU projects and exchange activities with some of their members.

# Partners and collaborators

Medicines Optimisation Innovation Center (MOIC) is a regional center in Northern Ireland dedicated to providing optimization of the medications for the population of Northern Ireland. CSG and MOIC signed an MOU in 2021 and have since performed multiple LEXs (Learning Expeditions) to NI and Galicia, and participated in project proposals together.

University of Plymouth is broad-based, research-intensive university, open to all who can benefit from a high level education, and delivering excellent interdisciplinary research, experiential education and civic engagement. CSG and University of Plymouth signed an MOU in 2020 and have since performed multiple exchanges and strategic consultancy.

# Introduction

In CSG, we have developed high value-added services with the aim of increasing our reach in supporting the competitiveness of the Galician health ecosystem in general and the #CSG\_Community in particular both inside and outside our borders.

After our experience of more than ten years working to promote the innovative ecosystem, we have identified the needs of the sector in three main areas: testing and piloting, internationalization and strategic consulting. In order to respond to these needs, we have designed a series of services within each area and customized for different profiles of public or private entities.

Members of our #CSG\_Community and international clients benefit from privileged access to these tools and a close, personalized and flexible service.

## TESTING AND PILOTING

Actions:

[www.itgall.tech](http://www.itgall.tech)

ITGALL is the Living Lab network managed by the Cluster Saúde de Galicia, CSG, which includes multiple living labs, spread throughout the region from Galicia, Spain.

---

*Piloting and testing of technological/digital solutions in the context of active and healthy ageing.*

### Are you a solution provider?

ITGALL is the perfect environment for testing your innovative solutions.

CSG guides you through the full testing process, working closely with the living lab managers:

- Evaluation of the potential solution.
- Preparation of people-centred support protocols.
- Testing reports.
- Fundraising orientation.

The #ITGALL network is based in the processes of:

- ✓ Co-creation.
- ✓ PCA-based piloting
- ✓ Validated protocols
- ✓ Well-being indicators and application of data science

# CSG Services

## INTERNATIONALIZATION

Actions:

**LEX**  
learning  
expeditions

The LEX (Learning Expeditions) are one of CSG's main internationalization services. They are trade and study missions with the main objectives of:

- ✓ Identifying strategic partners and investment possibilities in new markets.
- ✓ Putting the participants in contact (CSG partners or not) with stakeholders in the market of interest (investors, state agencies, innovation centers, etc.).
- ✓ Each LEX mission corresponds to a country, lasts between 5 and 6 days where general or specific topics are dealt with according to the particular interest of the participating companies.

19 LEX  
TRAVEL

# CSG Services

## INTERNATIONALIZATION

Actions:

RIES is the international forum of reference at a regional, national and international level to address the challenges and opportunities of the health ecosystem, led by the CSG.

It is the flagship event that brings together the main agents of the public and private healthcare and social care sectors in collaboration with the ECHA-lliance health ecosystem network.

Every year RIES draws attention to the most innovative results and challenges in healthcare.

# CSG Services

## STRATEGIC SUPPORT AND VISIBILITY

Actions:

### CSGCONNECT

[www.clustersaude.com/csg-connect](http://www.clustersaude.com/csg-connect)

It is a comprehensive internal communication system with a format that ensures:

The effectiveness, connection and synergies between partners, Directive Board and key players in the health ecosystem.

7

MEETINGS

The interrelation between partners that enhances the possibilities of working collaboratively.

+100

# STRATEGIC PROJECTS OF THE CSG

2023 - 2025

**CSG Budget:** 275.777, 52 €

[dihdatalife.com/edih](https://dihdatalife.com/edih)

The objective of this project is to accelerate digital transformation to create a fair, green economy and health suitable for the age of information. A digital revolution of high quality will be focused on the people, the environment in which they live and their well-being. The role of CSG focuses on the test-before-invest services (piloting services in our living labs), stakeholders and ecosystem engagement, dissemination of results and fostering collaboration between the public and private sectors.

2022 - 2024

**CSG Budget:** 93.250 €

[senior-eco-nect.com](https://senior-eco-nect.com)

The Senior Eco-Nect project aims at preparing a joint action plan to support the emergence and the development of European ecosystems dedicated to the silver economy, as well as to guarantee inclusion and interconnectivity among all the key stakeholders in innovation in the sector (healthcare) and the transversal sectors (tourism and sport). CSG participates in the stakeholder and solutions mapping to be included in the action plan, organization thematic workshops and the dissemination of the results.

2021 - 2022

**CSG Budget:** 207.500 €

[innovation4ageing.tehnopol.ee](https://innovation4ageing.tehnopol.ee)

Coordination and support to new expansion mechanisms provided by EIP in AHA and its stakeholders for a more efficient adoption of innovations in active and healthy ageing. CSG leads focus groups, tests and the implementation of a investment strategy (H2020).

2019- 2023

**CSG Budget:** 132.924,32 €

*neuroatlantic.eu*

The neuroATLANTIC project will contribute to addressing this challenge by proposing new standardized clinical protocols, innovative methods of diagnosis and treatment, and ensuring the transfer of technology at companies to encourage the adoption of innovations in real environments. CSG is responsible for capitalization (WP leader) and communication.

2017 - 2020

**CSG Budget:** 47.061,9 €

*es.codigomais.eu*

Aimed at establishing a cross-border health innovation ecosystem between the north of Portugal and Galicia. CSG is a stakeholder involved in the development of the strategic plan, identifying 30 of the stakeholders and organizing learning expeditions to European innovation centers (Denmark, Sweden, Israel and the Netherlands).

## IN THE **CSG** OUR KPIs ARE NOT THE NUMBERS OF FOLLOWERS... ARE:

### Visibility

Improve your visibility in the Galician Health Ecosystem and in all the national and regional networks to which the CSG belongs.

### Information

Communication with regulatory agents translates into opportunity information, joint identification of needs and co-creation of solutions.

### Networking

Facilitate the formation of consortia for collaboration in turnkey projects of value and impact.

### Knowledge

Information workshops and seminars on topics of interest (Healthy Information Pills) as well as training opportunities.

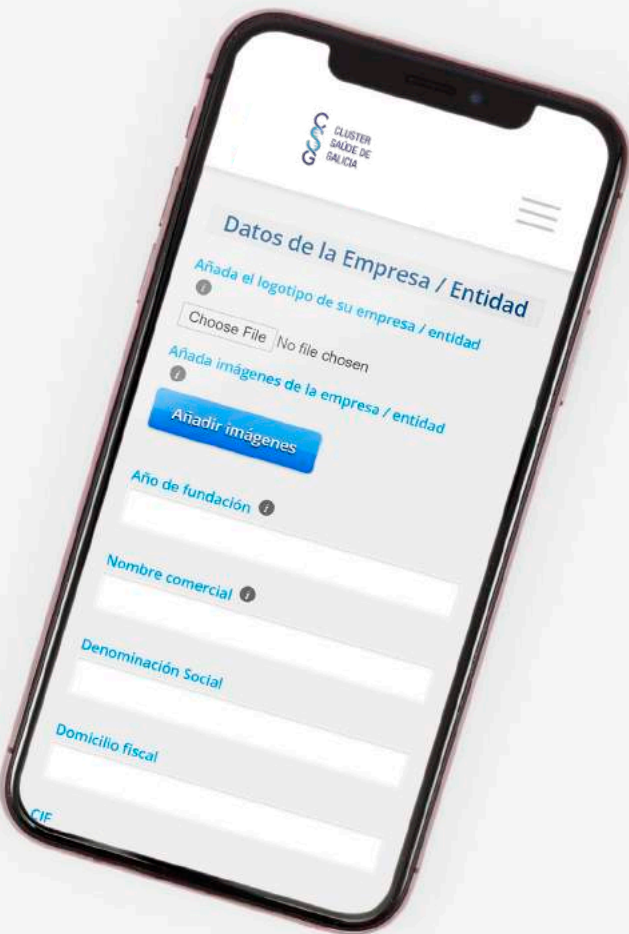

### Projects

Support for #CommunityCSG projects by making them visible and personalized consulting.

If you share our KPIs join the **#CommunityCSG**

## Will you join us?

You can join the **CSG** in three different steps:

- 1 Enter [www.clustersaude.com/en](http://www.clustersaude.com/en)
- 2 Complete the Membership Form
- 3 We will contact you to process your applicatio
